WORK EXPERIENCE

DigiTax

Nairobi

Software Development Intern

Jan 2025 - Present

- Contributed to the deployment of the tax automation platform across multiple institutions, resulting in a 40% improvement in submission turnaround times and supporting nationwide KRA compliance initiatives.
- Collaborated with a cross-functional team to develop an automated tax filing system, reducing manual processing time by 65% and increasing compliance accuracy for over 150 corporate clients in Kenya.
- Streamlined the onboarding process for over 150 institutions and corporations by redesigning the website navigation, reducing the filing time from an average of 45 minutes to under 20 minutes, thus improving user efficiency by 56%.

PROJECT EXPERIENCE

AkiraChix

Software Developer (Capstone Project)

Aug 2024 - Present

- Developed and optimized IoT-based speech therapy tools, increasing user engagement among children aged 2-6 by 35% and enhancing repetitive practice sessions for speech fluency correction.
- Collaborated with a multidisciplinary team to design intuitive interfaces, resulting in a 20% reduction in session setup time and improved accessibility for young children with speech disorders.
- Implemented real-time data collection features that tracked progress across 100+ therapy sessions, enabling clinicians to tailor interventions and achieve a 15% higher success rate in fluency improvement.

Personal Project

Machine Learning Feature Engineering

- Engineered an interactive performance dashboard featuring multi-tab views, real-time progress tracking, and dynamic task editing functionality.
- Built modular, reusable React components to optimize rendering performance and maintain clean state management across project modules.

Personal Project

Corporate Performance Tracker

- Engineered an interactive performance dashboard featuring multi-tab views, real-time progress tracking, and dynamic task editing functionality.
- Built modular, reusable React components to optimize rendering performance and maintain clean state management across project modules.

Personal Project

Skincare Monorepo E-commerce Platform

- Architected a modular monorepo structure to streamline codebase management across multiple web applications and shared UI components.
- Configured automated build, linting, and deployment workflows using modern tooling to optimize overall developer workflow and system reliability.

EDUCATION

AkiraChix codeHive

Nairobi, Kenya

Diploma in Information Technology

Graduation Date: Nov 2024

TECHNICAL SKILLS

Languages & Frameworks | Python, JavaScript, React, Next.js, GraphQL, TypeScript, AWS, SQL, PostgreSQL

Tools | Git, Docker, CI/CD, REST APIs, Agile, OOP, Microservices, Retool, JIRA, Linux, Figma

Data & ML | Machine Learning, Feature Engineering, Pandas, NumPy, Matplotlib, Data Pipelines, System Design

Design & Frontend | UI/UX Design, Human-Centered Design, Tailwind CSS, Responsive Web Design
